

Modules focused on meters, sensors, data collection devices, installation, identifying, tracking, and reporting leaks, integrating devices, systems, valves, transformers, and physical components.

## Metering & Measurement Technology

- Remote meter readings for meter readings
- Heat Intelligence
- Power quality monitoring
- Pulse Transmitters
- Pressure Sensor
- Pulse Tester
- Pulse adapters
- Pulse Counter
- Temperature sensors
- Precision Meters
- Exchange meters
- Temperature and humidity sensors
- Installation of heat, cooling and water meters
- Water heat intelligence
- Radio module for heat meters
- Meter reading
- Water data logging

## Leak Detection & Monitoring

- Monitoring and verification of leaks
- Running leak detectors
- Leak Detector
- Leak monitoring

## Integration & System Management

- Performing overview and reporting
- 3rd Party District Meter Integration
- Heat Intelligence Pipeline Integration
- Pipeline Integration Water Intelligence

## Hardware Components & Accessories

- Valves
- Safety Transformers
